

*Climate Neutral Group has a diverse portfolio of services to help you on the way to a climate-neutral product, service or organisation. All of our services can be used separately to reduce your CO<sub>2</sub> emissions and offset those that remain, but you can also choose to make the entire transition to climate neutrality in partnership with us. The transition process consists of four phases, each of which is associated with a number of services that help you to achieve your goals. The four phases are: goal-setting, gathering insight, the transition, and climate neutrality. Climate Neutral Group: small insights lead to big results.*

## Phase Target: Stakeholders' dialogue

### Stakeholders' dialogue day

*In a stakeholders' dialogue day, we oversee a conversation between you and those stakeholders that are important for you, such as your shareholders, customers and suppliers. During this dialogue you communicate your ambitions; their expectations and the possibilities quickly become clear. These serve as an input for you in formulating and then attaining your goal with respect to climate neutrality. This ensures that stakeholders are involved with the steps that your organisation is taking, right from the outset.*

### How do we set to work?

We organise the dialogue and the course of events during the day, in line with your wishes. During the dialogue you will discover what stakeholders that are important for you expect from your sustainability policy, and what ideas they can offer. This is also a chance to bring your organisation to the attention of these stakeholders and to inform them about your activities. We direct the dialogue so that there is an open conversation, since you are not both a participant and the organiser.

Naturally we structure the dialogue in accordance with your wishes, and in a way that communicates your ideas, so that everyone becomes involved and is motivated to contribute to and support your ideas.

### What can you do with the outcome?

Involving the right stakeholders in formulating your climate neutrality goal, at an early stage, has a number of advantages:

- It ensures support as the process proceeds
- It provides important input to formulate your goal in a practicable form
- It gives you an initial indication of who you can approach for particular kinds of help to achieve your goal,
- It means that the right people and stakeholders are already involved and will be easier to approach during the process.
